

FIELD TO MILL SOLUTIONS

Tailored and Standalone Solutions From P.X. Farms

Innovative Farming Methods

Controlled Traffic Farming (CTF), Real Time Kinematic (RTK) satellite navigation, skilled staff and high-tech machinery help reduce costs and environmental impact, and increase yield and efficiency

Estate Office

Dedicated team of highly skilled individuals work with you to deliver tailored solutions

The Lab

Accredited laboratory with up to 16 tests available for more than 10 crops. Others available upon request

The Grain Hospital

All combinable crops cleaned of admix and ergot, helping increase bushel weight and hagberg. Peas full colour and size sorted

Crop Storage

81,000+ tonnes of monitored stores and 2 weighbridges for independent farmers and grain merchants, with flexible agreements

Haulage

Accredited fleet includes 11 44-tonne lorries hauling grain, sugar beet, fertiliser and other agricultural products from field to mill

Getting Fit for the Future

The Agriculture & Horticulture Development Board (AHDB) impact assessment for Brexit states that the top 25% of businesses will remain profitable after Brexit. Since we cannot determine policy, performance matters. Farmers need to take action now to ensure they are fit for the future.¹

UK Statistics²

17.4 million hectares of Utilised Agricultural Area (UAA)

466 thousand labour force

£3610 million farming income estimated 7.5% less than 2015

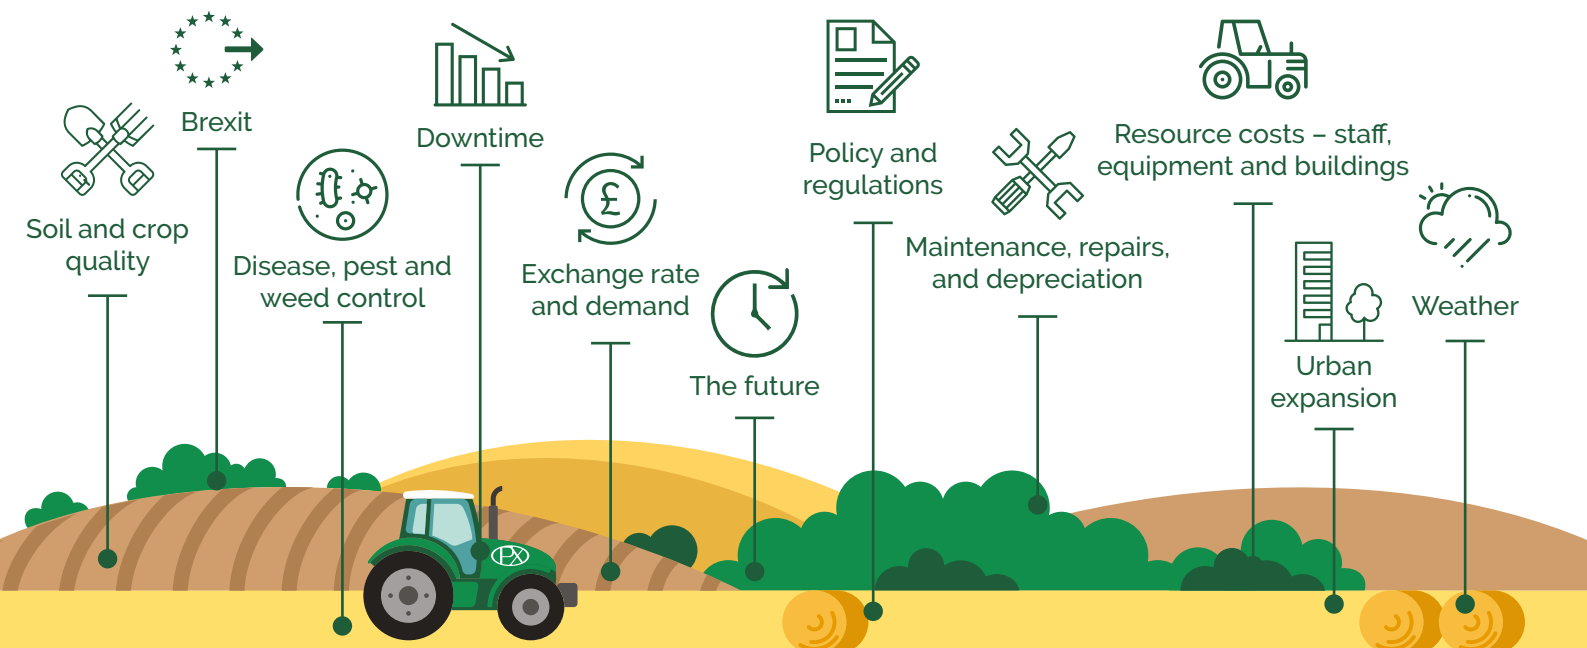

14.4 million tonnes of wheat (13% down from 2015) valued at **£1.6 billion** (21% decrease from 2015)

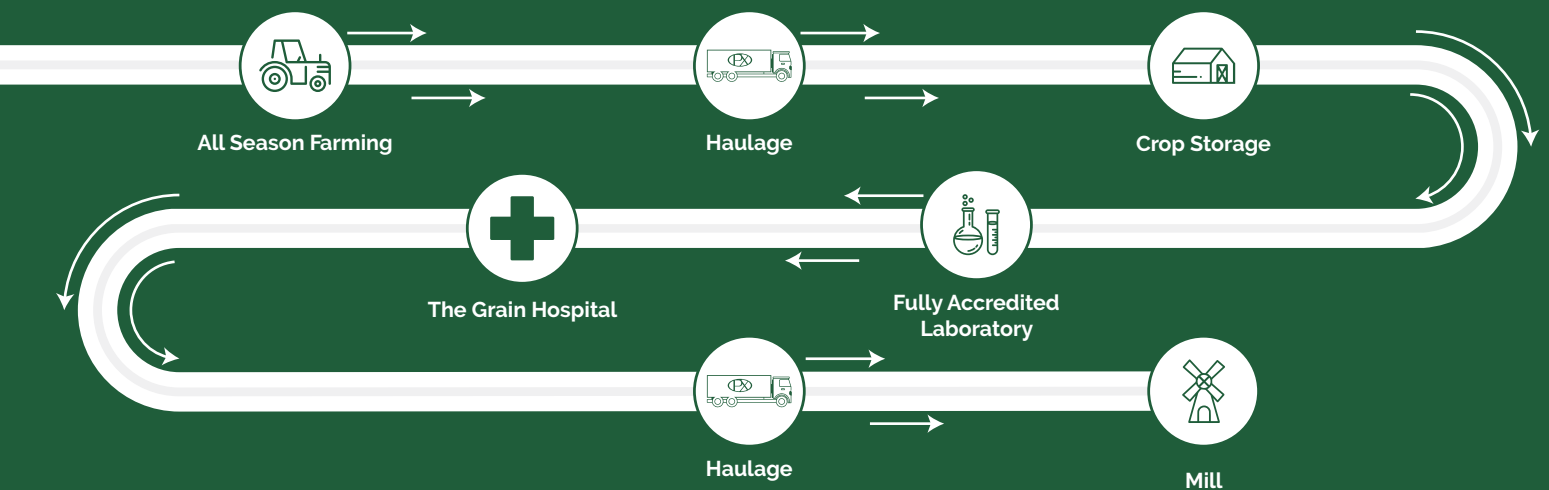

Vegetable production **£1.5 billion** (20% up) with majority of crops having a year on year increase

Arable farming faces so many challenges

P.X. Farms can help you get fit for the future with tailored and standalone solutions from field to mill
