

**P.X. Farms Ltd**

# P.X. FARMS AGRIBUSINESS

**Working together to  
increase yield and profitability**

## Farming

We have highly skilled staff equipped with the latest Controlled Traffic Farming machinery which is backed by our management expertise allowing us to establish and harvest the best possible crops. Streamlined activities enable us to reduce environmental impact, maintain soil quality using base fertiliser application, improve efficiency and increase profits. Our diversity of crop rotations promotes weed control and pest management. We can offer a tailored blend of arrangements:

- Contract farming
- Long term farming business tenancies
- Specialist crop licences

## Growing Crops

We use a broad rotation to grow a variety of crops including:

- Mustard
- Oil seed rape
- Spring beans
- Spring linseed
- Spring malting barley
- Spring milling and feed wheat
- Spring peas
- Sugar beet
- Vegetable crops
- Winter feed barley
- Winter milling and feed wheat

## Storage

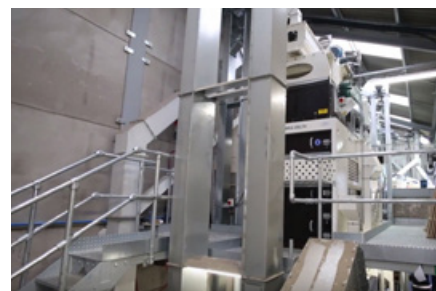

Located on Scotland Farm, Dry Drayton just outside Cambridge, our facilities:

- Provide storage capacity of 75,000+ tonnes within 13 storage compartments
- Include high-tech monitoring in each store that cools whilst aerating and maintaining temperatures at less than 5°C
- Are designed to manage over 5,000 tonnes of incoming crop a day during harvest, with the capacity to dry 60 tonnes per hour
- Offer a weighbridge and sampling services, enabling us to process a lorry in nine minutes and load out up to 180 tonnes per hour
- Give dedicated grain store office and laboratory services, enabling us to provide a complete solution for our clients

## Grain Hospital

We offer a collection, cleaning and delivery service for out of spec crops; using state of the art cleaning equipment to provide full colour and size sorting, and fine cleaning. The end result of this service can be:

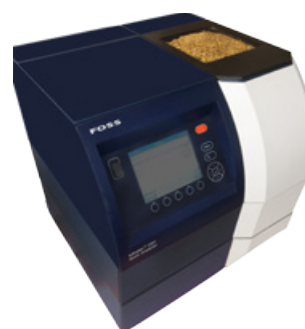

- Admix and ergot removed
- Premium enhanced
- Bushel weight improved
- Separation of commodities
- Pea colour sorted
- All combinable crops cleaned

## Fully Accredited Laboratory

We provide a GAFTA-accredited laboratory - whether as part of a tailored solution or as a standalone service. The laboratory can test for the following:

- Admixture
- Bushel weight KG/HI
- DON (wheat mycotoxin test)
- Ergot
- Green and red seed on OSR
- Hagberg falling number
- Hardness
- Infestation
- Moisture %
- Nitrogen
- Oils
- Protein
- Screenings
- Smell
- Wheat ochra test
- Wheat zear test

We are also capable of testing/treating:

- Barley
- Beans
- Linseed
- Mustard
- Oats
- OSR
- Peas
- Wheat
- Others on request

## Haulage

Our GAFTA-accredited haulage fleet of 11 44-tonne lorries haul grain, sugar beet, fertiliser and other agricultural products, and as our trailers only carry GAFTA-approved products, there is no risk of cross-contamination. All of our lorries are VOSA registered and come with fully-insured and qualified drivers who pride themselves on providing a first-class service to every customer.

Now working in conjunction with local and national grain merchants, we provide an efficient and effective logistic solution from farm or storage facilities to final destination.

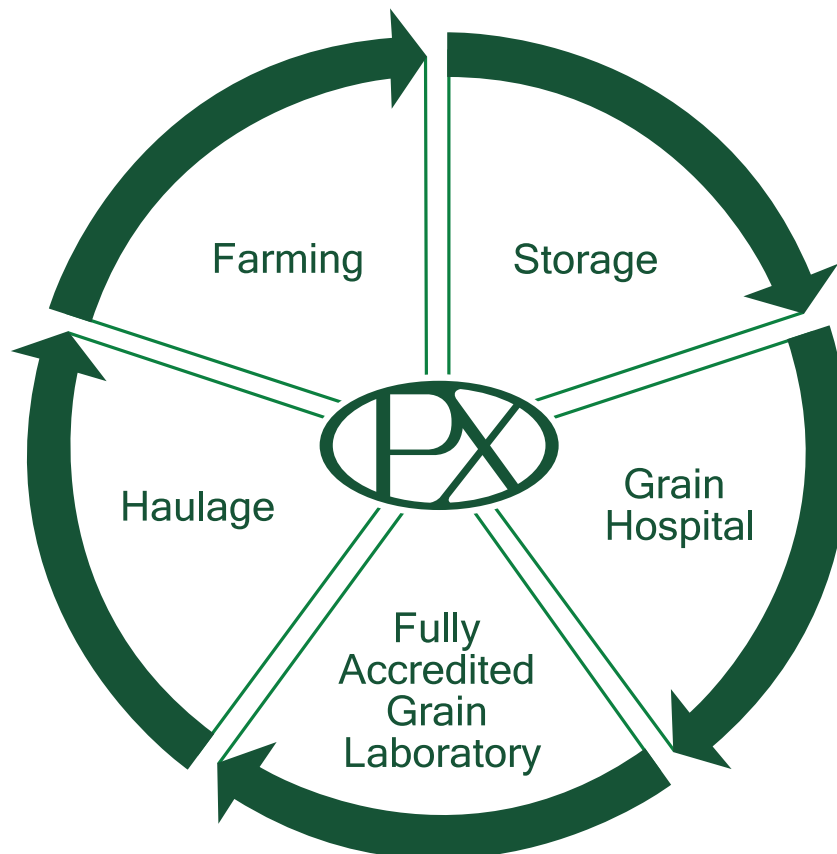

**P.X. Farms Ltd**

P.X. Farms is a professional and highly skilled agribusiness dedicated to ensuring profitability for both our clients and our family farm, whilst working in harmony with the countryside.

Using the latest technology and in-depth team expertise, we offer a wide range of agricultural services and provide tailored solutions to help establish, operate, grow and improve farm businesses.
